PARTICLEBOARD

MelaWood® is PG Bison's leading brand of melamine faced board, offering a range of globally inspired designs and finishes. It combines aesthetic appeal with functionality, providing a durable, 100% closed melamine-resin surface that offers superior protection.

Anti-Bacterial Protection - MelaWood® incorporates an anti-bacterial additive within its melamine resin, effectively eliminating bacteria that may settle on the surface within hours. This makes it ideal for hygiene-sensitive, high-traffic areas like healthcare facilities, offices, schools, restaurants, and retail spaces.

Durable and Easy to Maintain - The closed surface is resistant to scratches, moisture, and easy to clean with standard soap or alcohol-based disinfectants.

Long-lasting - The anti-bacterial properties are integral to the board, not just a surface coating, ensuring long-term effectiveness compared to porous materials like wood or stone.

How it's Made
MelaWood® is produced by bonding melamine-impregnated décor paper to both surfaces of a high-quality board using heat and pressure. This creates a robust, scratch-resistant surface. Exposed edges should be properly edged with suitable glue to prevent moisture damage.

Application
Ideal for medium duty vertical and light horizontal applications, such as freestanding and built-in cupboards, door and drawer frontals, carcasses and shelving, wall cladding and interior building elements, MelaWood® is perfect for kitchens, offices and shops.

MelaWood® is available in four fashionable surface finishes:

**Fusion** - natural, veneer look
Linear - strong textured, straight wood grain
Natural Touch - velvety matte finish
Peen - textured, stipple effect

MelaWood® is available in a variety of designs and finishes to meet diverse needs, ensuring both aesthetic appeal and superior performance in numerous applications.

ORIENTED STRAND BOARD

OSB (Oriented Strand Boards) are a versatile and essential material in construction, used for formwork, planking, installation panels, and as a decorative design element in furniture. Known for their rigidity, high bending strength, and resistance to water vapour diffusion, OSB boards are replacing plywood in many applications.

OSB 3 boards are flexible, strong, and suitable for a wide range of construction and design applications.

Key Features:
*   Strong, stable, and sustainable
*   Replaces plywood, especially in timber-framed houses and packaging industries
*   Used instead of silica or plaster-based construction materials
*   Made by bonding long timber strands with ECO resin in perpendicular layers
*   High moisture resistance and load-bearing capacity

Advantages:
*   Excellent processing capabilities
*   High durability and resistance
*   High load-bearing capacity
*   High-performance material
*   Structural strength

Applications:
*   Interior design
*   Billboard production
*   Exhibitions (displays, stands, kiosks)
*   Flooring base
*   Framework for upholstered furniture
*   Internal load-bearing cladding of walls, ceilings, and partitions
*   Load-bearing wall sheathing
*   Packaging
*   Warehouse management (racks, fences, etc.)

MDF - MEDIUM DENSITY FIBREBOARD

SupaWood®

How It's Made
SupaWood® is crafted using advanced technology, where wood chips are ground into fibers and blended with resin. These fibers are then bonded together under heat and pressure, resulting in a premium-quality panel product.

Using SupaWood®
Engineered to be dense, stiff, and ultra-flat, SupaWood® offers exceptional structural strength. Its lack of grain structure ensures excellent machinability in any direction, making it ideal for shaping through moulding, routing, turning, and edge profiling.

With its homogeneous composition, SupaWood® delivers smooth edges, free from chips or voids, when cut or profiled. It can be fabricated and installed using standard joinery techniques and well-maintained woodworking tools, ensuring high-quality results.

SupaWood® features a smooth, fine surface perfect for spray painting and PVC wrap finishes, as well as staining, varnishing, or finishing with melamine-impregnated décor, high-pressure laminates, or veneer. Suitable for both domestic and commercial applications, SupaWood® is a versatile choice. However, it is not recommended for exterior use or environments with high moisture content.

APPLICATIONS

MDF - MEDIUM DENSITY FIBREBOARD

Dimensions : 2750mm x 1830mm [9' x 6']

MDF BACKER - 3mm & 6mm

The thin MDF lacquered board is a highly flexible, 3mm fiberboard with a smooth, even surface. Thanks to innovative folding technology, it offers versatile applications. Available in a wide range of decorative finishes and made from sustainable materials, it is ideal for indoor use.

Applications
- Rear panels (shelves, sideboards, wardrobes)
- Drawers

EDGE BANDING

Edge banding is employed to cover the exposed edges of materials like particle board or MDF, providing the visual appeal of solid or more premium materials.

- Highly durable, offering resistance to external damage and impacts.
- Aesthetically pleasing, featuring impeccable designs and an impressive finish.
- Versatile, with a wide range of colours that seamlessly complement our particleboards.
- Customizable options, including smooth, textured, high-gloss, and wood grain finishes.
- Exceptional bonding quality, enhanced with a back primer coating for superior adhesion.
- UV resistant, ensuring long-lasting colour without fading.
- Scratch-resistant, maintaining a pristine appearance over time.

Why Use Edging?
- Protects the board: Safeguards it from damage and wear.
- Prevents moisture ingression: Helps to seal the edges, preventing moisture absorption.
- Enhances aesthetics: Provides a polished, finished look that elevates the overall appearance.
- Reduces chipping: Minimizes the risk of board damage and chipping over time.

SUPAMATT

PG Bison brings the latest in world trends to your doorstep with MelaWood® SupaMatt™.

MelaWood® SupaMatt™ has a soft, silky-smooth and sophisticated finish, adding a sense of elegance to any setting. This luxurious ultra-matt experience is for use in vertical applications only.

Although matt surfaces can be prone to showing fingerprints, MelaWood® SupaMatt™ incorporates leading technology to reduce the visibility of such fingerprints under normal, day-to-day conditions.

How it's made

Sophisticated technology is used to produce MelaWood® SupaMatt™. A hot coated polyurethane (PUR) is applied to MelaWood® with a SupaWood® core, before the uppermost coating is matted using the latest technology, specialised Excimer lamps and cured with ultraviolet (UV) light.

MelaWood® SupaMatt™ is supplied with a protective film to shield the matt face during handling and processing, so your finished product can arrive on site looking as good as you intended. The reverse side is a matching décor in NATURAL TOUCH finish.

For that luxurious touch and exclusive look, MelaWood® SupaMatt™ is your premium matt surface.

SUPAGLOSS

Making use of state-of-the-art, patented technologies, MelaWood® SupaGloss™ gives you a high-end, desirable, and hard-wearing gloss decorative finish.

How it's made

Hot coated polyurethane (PUR) is applied to MelaWood® with a SupaWood® core and then cured using ultraviolet (UV) light, producing a durable, high gloss surface with good wear and scratch resistance.

This technology also gives MelaWood® SupaGloss™ its consistent stability and visual depth. You can work in confidence knowing your finished product will look superb.

Manufactured by PG Bison, to international standards, MelaWood® SupaGloss™ gives you the assurance of a dependable, readily available product, consistent in colour and surface finish. You never have to worry about one batch of board not matching the next or the possibility of discolouration.

With matching decor in a PEEN finish on the reverse side, MelaWood® SupaGloss™ is supplied with a protective film to shield the gloss face during handling and processing, so your finished product can arrive on site looking as good as you intended.

PVC FOIL WRAP
Sold per SQ MTR Only

Pressform 3D laminate films are designed for lamination onto CNC machine-routered and profiled MDF panels using a thermoforming process. These films allow for the creation of 3D designs on the panel face while simultaneously laminating all four sides, eliminating the need for edge banding.

Pressform 3D laminate MDF panels combine innovative technology with exceptional durability, offering versatile solutions for both residential and commercial applications. They are ideal for a variety of applications, including: kitchen, vanity, and wardrobe door frontals, wall paneling, internal doors, furniture components, retail interiors, hospitality, and office spaces.

The decorative films used in the production process have excellent mechanical resistance, light fastness, and stain resistance. The materials have outstanding dimensional stability and are resistant to temperatures commonly found in kitchen environments. The surface of the film is coated with a scratch-resistant lacquer that protects the material in use and helps withstand wear and tear.

Advantages:
• Stain resistance
• Temperature resistance for kitchen environments
• Limitless 3D patterns and colours
• Latest technology for vacuum/membrane and thermoforming
• High-precision CNC routing
• Premium German films
• Superior bonding and surface quality

LIFT SYSTEMS	Product Code	Product Description	More Info
	A0000293	AVENTOS BLUMOTION HK-XS Lift PF1301 Kit	AVENTOS HK-XS provides enormous scope for the design of tall units and wall cabinets. Even cabinets with little depth are now possible. The solution has a symmetrical lift mechanism. For small and light fronts, use a single lift mechanism on one side of the cabinet. For larger and heavier fronts, attach a lift mechanism to both sides. For wooden fronts and fronts with wide or narrow aluminium frames. BLUMOTION gives you soft and effortless closing. And handle-less fronts open with ease with the TIP-ON mechanical system.
	A0000294	AVENTOS BLUMOTION HK-XS Lift PF1501 Kit	
	A0000496	AVENTOS HK Top Lift Stay Orion Grey Kit	AVENTOS HK top blends discreetly into tall units and wall cabinets. The stay lift has already won several awards for its minimalist design. AVENTOS HK top boasts many integrated features such as a safety mechanism and opening angle stop.

BLUM
LIFT SYSTEMS

↑blum®
Perfecting motion

The AVENTOS lift system offers seamless functionality for wall cabinets. Even larger lift systems open effortlessly, stay in any desired position, and close smoothly and silently, thanks to the BLUMOTION technology.

The Lift Systems have;

- BLUMOTION - silent and effortless closing action
- Quick, easy assembly and removal due to CLIP technology
- Easy, 3-Dimensional front adjustment
- Perfectly balanced - fronts remain in any desired position
- No protruding parts
- Optimised ergonomic handle position
- SERVO-DRIVE - Electrical motion support system for wall cabinets

LIFT SYSTEMS	Product Code	Product Description	More Info
	A0000495	AVENTOS HF Bifold System PF 5350 - 10150 Orion Grey Kit	The AVENTOS HF bi-fold lift is the ideal solution for high and mid wall units. Even large fronts fold up and out of the way, giving users great freedom of movement. So much so that wall cabinets can be left open during cooking.
	A0000300	AVENTOS HF Bifold System PF 2600 - 5500 Orion Grey Kit	Thanks to soft-close BLUMOTION, furniture closes softly and effortlessly no matter how hard you slam fronts, doors or pull-outs or how heavy they are.
	A0000347	AVENTOS HF Bifold System PF 5350 - 10150 Servo Drive Kit	The AVENTOS HF bi-fold lift is the ideal solution for high and mid wall units. Even large fronts fold up and out of the way, giving users great freedom of movement. So much so that wall cabinets can be left open during cooking.
	A0000679	AVENTOS HF Bifold System PF 2600 - 5500 Servo Drive Kit	Servo Drive motion technology delivers supreme opening ease. A single touch suffices and lift systems, pull-outs and fridge/freezers seem to open by themselves. They close again softly and effortlessly with soft-close BLUMOTION.

HARDWARE & FITTINGS
SLIDING DOOR SYSTEM

OPK offers various solutions for furniture sliding fittings that offer soft close function when opening & closing and provide innovative solutions that improve your life.

OPK ECONOMY
OPK Ecomomy is the entry level sliding system with screw on rollers.

Advantages
• Simple & hustle free adjustments and installation
• Available in 2 & 3 door sets
• Available with intergrated soft close systems.

OPK SUBMARINE 8
OPK Submarine 8 is a smooth and affordable sliding system with intergrated wheel sets allowing for better weight distribution.

Advantages
• Simple & hustle free adjustments and installation
• Available in 2 & 3 door sets
• Available with intergrated soft close systems.

OPK SUBMARINE 9
OPK Submarine 9 is a sliding door system for furniture and shelving systems. Due to its flexible application possibilities, it is also ideal for traditional crafts.
OPK Submarine 9 can also be retrofitted, without having to make any milling on the cabinet body. The both sides damping with tumbler is integrated in the running track and thus invisible.

Advantages
• Different construction variants possible
• Doors thickness 16-25 mm
• Easy, fast, tool-free installation, comfortable height adjustment of the fronts
• Both sides, invisible damping 15 / 30 kg for minimum installation width and fixable end position
• Closure / fixation of the end position possible without damping

OPK SUBMARINE S
OPK Submarine S is a sliding door system for shelving systems. It is a system running in front of the shelf and can also be retrofitted. The both sides damping with tumbler is integrated in the running track and thus invisible.
OPk Submarine S is a pre-front solution and therefore a perfect solution for shelving systems. It has narrow running tracks with a modern design, and is simple and easy to install.

Advantages
• Different construction variants possible
• Subsequent installation possible
• OPK Submarine S, wooden doors thickness 15-30 mm
• OPK Submarine S, 18 mm and 25 mm running tracks
• Decorative cover for a closed overall picture
• Easy, fast, tool-free installation, comfortable height adjustment of the fronts
• Both sides, invisible damping 15 / 30 kg for minimum installation width and fixable end position

OPK OCEAN 1
OPK Ocean 1 is an excellent fitting for sliding doors. The sliding doors allow clear access to the content. It has a high load capacity of 80 kg per door. The high-quality, ball-bearing carriages paired with modern design, as well as self-cleaning rollers by attached brushes, ensure an almost maintenance-free running culture.

Advantages
• Various design variants possible, 2, 3, 4 doors
• Cabinets up to 2800 mm high and 1500 mm wide doors
• Door thickness 18-40 mm
• Decorative panel, dust cover of the guiding rollers
• Easy and safe installation, comfortable height adjustment of the fronts
• Robust aluminium track in EV1
• High-quality carriages with ball-bearing plastic rollers for door leaf weights up to 80 kg for extremely light and quiet running
• Both sides damping with fixation, two-way damping with fixation of the middle door
• Anti-jump function, safety catch

Blum Hardware Care Guide

"Quality throughout your product's life"

Blum's goal has been to develop products that guarantee problem-free function throughout their lifespan. To demonstrate their committment to this, Blum tests their hinges to two thousand opening and closing cycles, their runners and pull-out systems are tested one hundred thousand times fully loaded, and their lift systems are opened and closed eighty thousand times.

This enables us to give a guarantee against product product failure during their lifespan of the cupboards. As an added protection against rust, all Blum CLIP-top hinges have three protective coatings of copper, nickel and an additional protective film. All other Blum hinges have been given this additional coating since the begining of 2003.

The following care must be taken with Blum hardware, in order to keep this guarantee valid:

1. No cleaning liquids are to be used on the hardware as certain brands contain additives that destroy the nickel coating causing rust. Only a damp cloth should be used for cleaning.
2. All glazing of exterior windows and hanging of external doors must be completed before hardware installation is performed.
3. Do not overlaod the hardware. Each hinge has a carrying capacity of 3.5kgs while most standard runner systems have a load bearing capacity of 60kgs per pair static and 25kgs dynamic, TANDEM and TANDEMBOX intivo have a dynamic capacity of 30kg. Blum does not cater for heavier duty runners / box systems which are recommended for wider drawers.
4. All granite work should be completed before installing runner systems as the subsequent dust might affect the function adversely.
5. Using cleaning products, such as abrasive cleaning powder, steel wool and scourers, as well as cleaning agents such as acetone, chlorine, cellulose thinner and solutions whose names start with tri or tetra
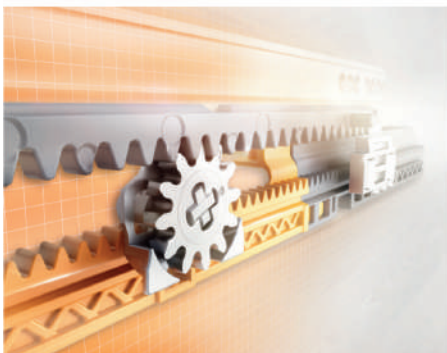

Blum conforms to ISO 9001 which is an internationally quality standard governing the assurance of product quality, service quality and quality of cooperation. Blum also meets theISO 14001 standards of environmental management systems.

Kindly note that any claims are voided if Blum products are used / installed incorrectly and not to Blum's Specification and stipulations given in the Blum Catalogue.

As distributors, we have total confidence in the superior quality of Blum hardware. If you have any queries, please do not hesitate to contact us.

HARDWARE CARE GUIDE

Kinetic hardware products are finished with the latest surface treatments to provide the longest life possible. Prolonged use and varying climate conditions may cause some finishes to age over time. This is a natural process and does not indicate a fault in the manufacture of the product.

CARE & MAINTENANCE

1. No cleaning liquids are to be used on the hardware as certain brands contain additives that destroy the nickel coating and cause rust.
2. Do not use cleaning products, such as abrasive cleaning powder, steel wool and scourers, as well as agents such as acetone, chlorine, cellulose thinner and solutions whose names start with tri or tetra.
3. Do not use mild acid to clean tiles and areas around cabinets as this will cause the hardware to rust / oxidise.
4. Use a damp cloth only for cleaning.
5. Do not overload the hardware
6. All granite / worktop jobs should be completed before installing runners as the dust will affect their functionality.

DISCLAIMER

PG Bison will not accept claims if the product is subject to;
1. Incorrect installation
2. Use of a product for which it was not designed for
3. Improper or lack of maintenance
4. Not following care and maintenance guide
